

Ensure Fresh Mineral Water with these products!

FROG® Test Strips

- It's the only strip with the ideal bromine range for FROG® hot tubs.
- Most test strips show this level as too low, causing confusion.
- FROG® Test Strips help dial in the right setting for your hot tub.
- The result: Your Bromine Cartridges will last up to 50% longer!
- Using standard test strips can lead to over bromination and wasting money.

FROG® Jump Start

- Start-up shock removes contaminants and sets the residual. Effervescent action helps the chlorine dissolve faster.
- Takes the start-up load off the Bromine cartridge so it lasts longer. Use when draining and refilling the hot tub - up to 500 gallons.

Give your spa more "Ahh!"

With

Fresh
Mineral Water
Easy™

Fresh Mineral Water After a hard day, nothing's softer.

You've never felt anything like the silkiness of a Fresh Mineral Water hot tub from FROG®. And you won't believe how fresh and clean your water stays with so little work - or so little bromine. And with less bromine, your swimsuit colors stay bright - and that spa odor is history.

Set it and forget it. It's just that easy.

The long-lasting bromine cartridges are hidden away - out of sight, out of mind for weeks at a time. The mineral cartridges last even longer - four months! And they're pre-filled so you never touch chemicals.

With Fresh Mineral Water you can really relax.

You bought a spa to refresh your mind and body. Nothing lets you do that better than the Fresh Mineral Water you get with a FROG® In-Line System. Your main job? Relax.

FROG® Transforms Spa Care

The built in FROG® In-Line System takes the thinking out of spa care with easy to set and replace cartridges. No measuring, no mess and no work for weeks at a time. The minerals destroy bacteria and help keep the pH in line with less monitoring. A low 1.0 bromine level (50% less than most spas) finishes the job.

Why have ordinary water from standard water treatments when you can have Fresh Mineral Water from FROG that's

Cleaner
Clearer
Softer
Easier
