**b.** Look at the **Total Alkalinity** reading first. Adjustments

should be made to bring the Total Alkalinity in the range of

80 - 120 ppm prior to making any adjustments to pH even if

**C**■ After Total Alkalinity is in range, **test for pH**. It should be between 7.2 and 7.8. If higher or lower, add a pH adjuster.

The In-Line System is made up of:

(A) a cap that is easily distinguishable among the fittings on the top of the hot tub

(B) a cartridge holder that pulls out of the system

(C) a FROG Serene Mineral **Cartridge** that helps control bacteria in the water

(D) a FROG Serene Bromine Cartridge that helps support the minerals while oxidizing contaminants like body oils and ammonia compounds responsible for smelly chloramines. The cartridges are adjustable to meet your specific hot tub water care needs.

Fill hot tub with fresh water.

If using source water that is high in

iron or other metals, see your dealer

before filling the hot tub. It may

require the use of a metal control

Clean or replace filter cartridges

(Follow manufacturer's instructions).

# Step 2: Set the Cartridges

Set the blue FROG Serene Mineral Cartridge to #6 (hold the bottom and turn the top until 6 appears in the window). No further adjustments are necessary for the life of the cartridge.

System Setting Chart	
200 Gallons	0
250 Gallons	1
300 Gallons	1
350 Gallons	2
400 Gallons	3
450 Gallons	4
500 Gallons	5
550 Gallons	5
600 Gallons	6

**Set the green FROG Serene Bromine** Cartridge to the setting that matches your hot tub size in gallons. For one week test the water daily with FROG Test Strips and adjust cartridge up or down by 1 setting per day until the color on the test strip matches the ideal FROG bromine range of 1.0 to 2.0 ppm.

# **Step 3: Put the System to Work**

Open cap of In-Line System and set aside.

DO NOT OPEN CAP WHILE JETS ARE ON.

NOTE: Using

can cause over

which shortens

Remove holder by pushing down and turning counter clockwise before pulling out.

diagrams). Line up holder arrow-(1) with system arrow-(2). Push down until holder tabs-(3) go past system tabs-(4) and turn holder to the right (clockwise) until it stops. To ensure a locked position, attempt to pull holder up. If it stays in place, the lock is secure.

Slowly insert holder into system (see

## **Replacing Cartridges**

### Replace blue Mineral Cartridge every four months.

- Discard it in the trash even if it appears to have media left inside.
- Don't attempt to reuse: the minerals are spent after 4 months.

### Replace green Bromine Cartridge when empty.

- · Life of cartridge varies depending on hot tub size and number
- · Drain water from cartridge to ensure it is empty. Discard in trash or offer for recycling if available.

# **Step 4: Routine Hot Tub Care**

Drain and refill hot tub as directed by your hot tub manufacturer or every four months when FROG

Maintain at least a 1.0 ppm bromine level at all times. **Note:** Bromine levels are reduced up to 50%\* when using FROG minerals.

Shock the hot tub once a week or as needed with a non-chlorine shock. Heavily used hot tubs may require more frequent shocking.

Replace mineral and bromine cartridges as directed in Step 3: Put the System to Work.

minerals need to be replaced.

Run filtration system as the manufacturer recommends to maintain proper water flow through the In-Line System.

Regularly test water with FROG Test Strips and follow directions in Step 1 for maintaining pH, Total Alkalinity and Calcium Hardness.

**NOTE:** pH is affected by bather load, chemicals used, evaporation and the make-up of your source water so maintaining water balance regularly is important.

Cloudy Water or Low-Bromine Levels

## 150 and 250 ppm. If higher, partially drain the hot tub (about 6 inches) and fill with water low in calcium. If lower, add Calcium Increaser. If balancing takes longer than 2 days, shock the water and **Troubleshooting**

maintain a chlorine level while continuing balancing.

**d.** Lastly **test for Calcium Hardness.** It should be **between** 

Very Important! Before using cartridges, establish an initial residual of 0.5 - 1.0 ppm free chlorine with FROG® Jump Start® (EPA Reg. No.: 53735-12) start-up shock, included in this package, that quickly dissolves

IDEAL

with an effervescent fizzing action - one packet per 600 gallons.

Heat water to the manufacturer's recommended temperature.

 Check water balance. pH and Total Alkalinity need to be in the proper ranges for the FROG Serene In-Line System to work correctly.

- Make sure your FROG Serene Mineral Cartridge is not older than 4 months as it will be ineffective and more bromine will be required to maintain the hot tub until you replace the minerals.
- Shock the hot tub with a non-chlorine shock to regain

# High Bromine Levels

· Remove the FROG Serene Bromine Cartridge from the In-Line System until the bromine level is down to 2.0 ppm.

\* Compared to the minimum ANSI recommended bromine level of 2.0 in a
