

# Pool Awake!<sup>®</sup> Operation Instructions

It's as easy as Ready, Set, Go!

**READY:**  
Start by removing contaminants to keep water crystal clear.

AQUA SMARTE<sup>®</sup>  
Plus<sup>®</sup> Shine<sup>®</sup>

**SET:**  
Then set your initial chlorine level.

AQUA SMARTE Plus<sup>®</sup>  
Optimize<sup>®</sup>

**GO:**  
Then prevent algae with a 90-day algae protection guarantee.

AQUA SMARTE Plus<sup>®</sup>  
CANNONBALL!<sup>®</sup>

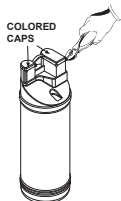

**For Spring Openings:** After balancing the pool water and inserting a new AQUA SMARTE Plus Mineral Activator<sup>®</sup> into the AQUA SMARTE Plus Docking Station<sup>®</sup>, follow steps 1 through 3 to start-up the pool.

Water Balance Guidelines	
pH:	7.2 – 7.8
Total Alkalinity:	80 – 120 ppm
Calcium Hardness:	200 – 400
Total Dissolved Solids:	<1500
Stabilizer:	20 – 80 ppm
Free Chlorine:	0.5 – 1.0 ppm

## 1. Start with AQUA SMARTE Plus Shine

1. With the circulation system off, set control dial to the lowest setting and remove the cap to the AQUA SMARTE Plus Docking Station.

2. Remove caps from AQUA SMARTE Plus Shine with a pliers or other suitable tool.

3. Turn AQUA SMARTE Plus Shine over so open ends face down and insert into the center of the AQUA SMARTE Plus Mineral Activator. The ends of the pac will align with an L-shaped key in the system. DO NOT FORCE.

4. Replace cap on AQUA SMARTE Plus Docking Station and set dial to Setting 10.

5. Turn on pump and allow 1 hour for the product to slowly dispense into the pool. If after 1 hour, the pac still contains some ingredient, re-insert, replace cap and run the circulation for an additional 30 minutes.

6. Remove the empty AQUA SMARTE Plus Shine and discard or offer for recycling if available.

7. Replace cap on AQUA SMARTE Plus Docking Station and allow circulation to run at least 15 minutes before inserting any other AQUA SMARTE Plus products.

8. Repeat steps 1-7 if additional AQUA SMARTE Plus Shine is required.

## 2. Then add AQUA SMARTE Plus Optimize

Dispense AQUA SMARTE Plus Optimize to establish an initial chlorine level in the pool following the same steps 1 through 8 for AQUA SMARTE Plus Shine.

## 3. Lastly use AQUA SMARTE Plus CANNONBALL!

After AQUA SMARTE Plus Shine and AQUA SMARTE Plus Optimize have dispensed, test the water before adding AQUA SMARTE Plus CANNONBALL! for a 90-day algae-protection guarantee. When the pH is between 7.2 and 7.8 and the chlorine level is no more than 4.0 ppm, follow steps 1-8 below.

1. Turn off pump and turn dial to the lowest setting and remove cap from the AQUA SMARTE Plus Docking Station.

2. Remove cap from AQUA SMARTE Plus CANNONBALL! without removing seal.

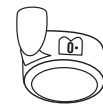

3. Insert upside down into center of AQUA SMARTE Plus Mineral Activator pushing down firmly on key to puncture seal.

4. Replace cap by hand only. DO NOT OVER TIGHTEN. Turn control dial to Setting 10.

5. Turn pump on for 90 minutes allowing AQUA SMARTE Plus CANNONBALL! to circulate through pool.

6. To remove AQUA SMARTE Plus CANNONBALL!, turn pump off, turn dial to lowest setting and remove system cap.

7. Lift AQUA SMARTE Plus CANNONBALL! up and allow any water in the container to drain through the system before discarding in trash or offer for recycling if available.

**NOTE: If water shows more than a hint of blue inside AQUA SMARTE Plus Docking Station, replace the cap, turn dial to Setting 10 and run the pump for one minute.**

8. If pool size requires additional AQUA SMARTE Plus CANNONBALL!, repeat steps 1-7.

**NOTE: Avoid adding other chemicals until this product has been circulated (filtered) for at least 24 hours.**
