

EASY TO SET-UP GUIDE

Minerals
+
Chlorine

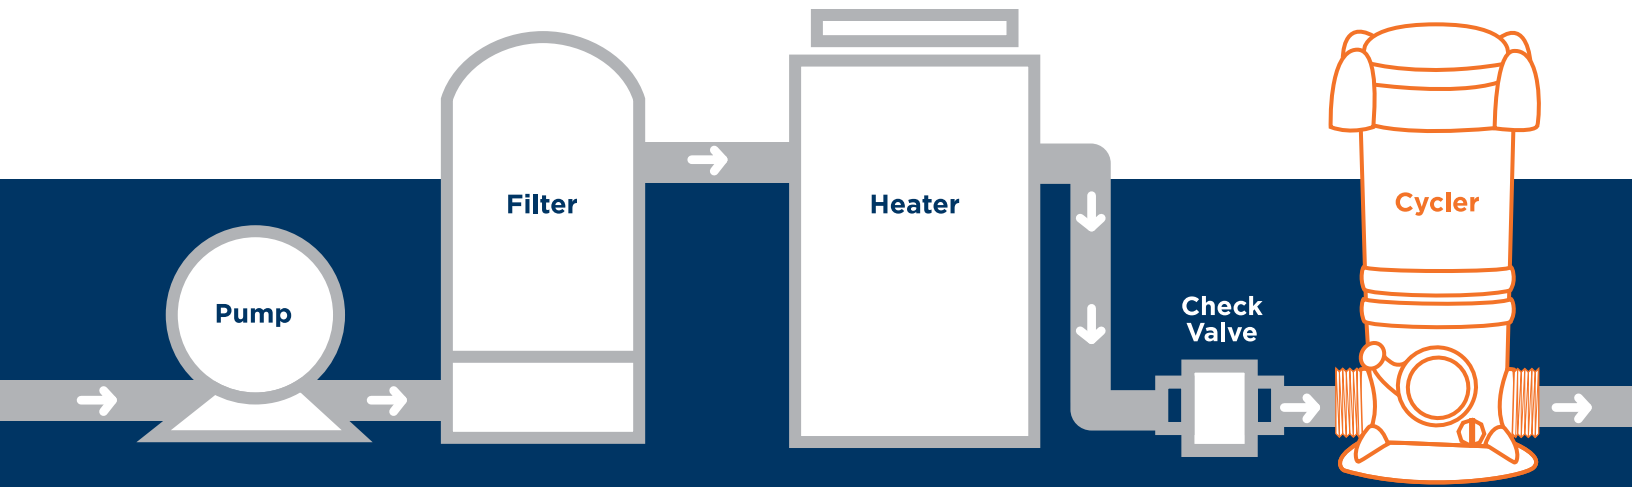

Kills bacteria
2 ways

50%

Reduces chlorine
use up to 50%*

FROG kills bacteria 2 ways with minerals and a low level of chlorine (only 0.5 to 1.0 ppm) so your water is cleaner, clearer and softer than standard water treatments.

Install **FROG® Pool Tender™ Cyclier** between the filter and the return of the pool.

(See pages 7-10 in the instruction manual for step by step directions)

Cyclor

Put Pool Tender Mineral Chamber
inside Pool Tender Cyclor

Replace every spring

ALGAE PREVENTATIVE

step

2

Cyclor

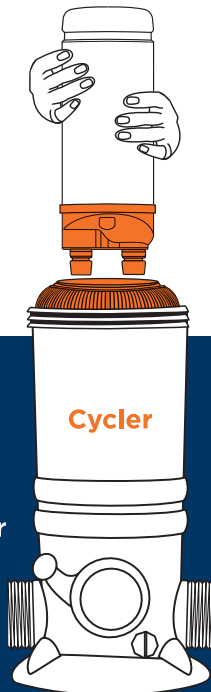

Put Pool Tender Algacide in
and dispense over 90 minutes

Lasts 90 days!

CHLORINE

step

3

Cyclor

Put Pool Tender Chlorine Chamber
in and set dial for your size pool
(see chart in manual on page 13)

Replace when empty

Use only FROG Test Strips to
ensure proper chlorine, pH and
alkalinity levels—to achieve
Fresh Mineral Water® perfectly.

Chlorine
levels are
TOO LOW

- 1) Make sure Chlorine Chamber contains chlorine
- 2) Turn dial up on Cyclor and/or increase filter run time

TROUBLESHOOTING TIPS

Chlorine levels can fluctuate
depending on various factors.

Consider these quick fix steps or visit
Diagnose a Problem at frogproducts.com.

Chlorine
levels are
TOO HIGH

- 1) Remove Chlorine Chamber from Cyclor until levels come down
- 2) Turn dial down on Cyclor and/or decrease filter run time
