

Industrial Design Intern

Job Description

Are you passionate about turning innovative ideas into tangible products? We're seeking a talented Industrial Design Intern to join our dynamic team at King Technology. As an intern, you'll contribute to the development of new consumer packaged goods by:

- **Research and Analysis:** Conducting market research to identify consumer needs and trends.
- **Concept Development:** Generating creative ideas for product designs that align with our brand identity and target audience.
- **Sketching and Modeling:** Creating detailed sketches and 3D models of product concepts.
- **Prototyping:** Assisting in the fabrication and/or 3D printing of physical prototypes and for testing and evaluation.
- **User Testing:** Gathering feedback from consumers to refine product designs and improve functionality.

Qualifications:

- Pursuing a degree in Industrial Design or a related field.
- Strong design skills, including sketching, modeling, and rendering.
- Proficiency in design software (e.g., Adobe Creative Suite, SolidWorks).
- Excellent problem-solving and communication skills.
- A passion for consumer products and a desire to make a positive impact.

Internship Benefits:

- Gain hands-on experience in the consumer packaged goods industry.
- Work with a talented team of designers and engineers.
- Develop your design skills and portfolio.

- Contribute to the development of innovative products.

If you're a motivated and creative individual looking to make a difference, we encourage you to apply for our Industrial Design Internship.
