

FROG Balancing Basics™ Kit Wins Innovative Product Showcase Award

2025 Pool Spa Patio Expo Recognizes Ground-Breaking Products and Technology

Minnetonka, MN—King Technology, Inc., innovator in water care solutions since 1979, is pleased to announce that its FROG Balancing Basics™ Kit is the winning innovation in the Chemical Sanitizers Category in Pool Spa Patio Expo's 2025 Innovative Product Showcase. This is the second year in a row a FROG® pool, hot tub or swim spa product has been featured and won. Winners are chosen by Expo attendees to truly showcase products recognized by leading experts in the pool and hot tub industry for their innovation and impact.

The FROG Balancing Basics Kit features five essential startup chemicals—each with a FROG TruDose Cap™ for precise measurements—that make it easy to achieve perfect water balance for hot tubs or swim spas. The five essential chemicals include:

- **FROG JumpH™**: Quickly raise the pH in the hot tub or swim spa to protect surfaces and equipment, prevent irritated eyes and dry itchy skin, and boost sanitizer performance.
- **FROG DropH™**: Reduce the pH level to prevent cloudy water, stubborn scale and costly equipment damage.
- **FROG TArget™**: Maintain balance in your water by managing the total alkalinity to prevent sudden swings in pH.
- **FROG SooThE™**: Raise calcium hardness to protect the hot tub or swim spa from corrosion and scaling.
- **FROG StoMPS™**: Wipe out dirt, sweat, oils and other contaminants that cloud water and strain the sanitizer with this powerful, chlorine-free oxidizer for a smarter way to shock.

Each of the five chemicals work seamlessly together to make water care and balancing effortless and worry free. The kit also includes a FROG VIP™ membership which gives FROG users priority access to certified water care experts via phone, text or live chat. The FROG Balancing Basics Kit is one of the latest additions to FROG, a line of pool, hot tub and swim spa products that have made water care easier for decades.
