

Job Summary

Are you passionate about transforming innovative ideas into real-world products? King Technology is seeking a talented **Industrial Design Intern** to join our dynamic team. In this role, you'll support the development of new consumer packaged goods by contributing your creativity, technical skills, and user-centered design thinking.

Key Responsibilities

- **Research & Analysis:** Conduct market and consumer research to identify needs, trends, and opportunities.
- **Concept Development:** Generate creative and brand-aligned product concepts for our target audience.
- **Sketching & Modeling:** Produce detailed sketches and 3D models to visualize product ideas.
- **Prototyping:** Assist with prototype fabrication, including 3D printing, for testing and evaluation.
- **User Testing:** Collect and analyze consumer feedback to refine product designs and improve functionality.

Qualifications

- Currently pursuing a degree in Industrial Design or a related field (sophomore–senior preferred).
- Strong skills in sketching, modeling, prototyping, and rendering.
- Proficiency with design tools such as Adobe Creative Suite and SolidWorks.
- Excellent problem-solving, communication, and collaboration abilities.
- A passion for consumer products and a desire to make a meaningful impact.

Internship Benefits

- Full-time Summer 2026 internship (10–12 weeks, 40 hours/week).
- Hands-on experience in the consumer-packaged goods industry.
- Opportunity to work closely with experienced designers and engineers.
- Skill development and portfolio-building opportunities.
- The chance to contribute to the creation of innovative, real-world products.

Compensation

- Competitive hourly rate: \$20–\$26, based on experience.
-
