

FROG® 4Pro Drop ‘n Go™ Pool Pod Technology Product Launch

Service Pro Exclusive Drop ‘n Go™ Pool Pods—Made by the Pros for the Pros™

Minnetonka, MN — Jan. 26, 2026—King Technology, Inc., innovator in water care solutions since 1979, has expanded FROG® 4Pro — a line of pool solutions made by the pros for the pros. The line includes three Drop n’ Go pool pod solutions: FROG® Algae Blocker 4Pro™, FROG® Clarifier 4Pro™ and FROG® Phosphate Remover 4Pro™. Each works by simply dropping a pre-measured pod into the skimmer where it dissolves within hours and treats water for up to six months.

With this exclusive trio of pool products, service professionals can do more for less at each stop on their route. FROG 4Pro pods are up to seven times lighter than a quart of liquid chemicals, are premeasured and prefilled to avoid under or overdosing, are safe for all pool types and improve filter efficiency. When used together, the trio of FROG 4Pro Drop ‘n Go pool pods make weekly rounds more effective, more efficient, and more profitable. No mess. No guess. No stress.™

“For the FROG 4Pro line of Drop ‘n Go pool pods we took every aspect of a pro’s job into account to create something so effective it saves time, boosts profits and makes water care much easier,” said Dan Longhenry, director of engineering at King Technology. “After years of research, information gathering and product testing, we landed on three pool pod products that immediately transform the typical day of a pool service professional and create more customer satisfaction and retention.”

FROG Algae Blocker 4Pro is an EPA registered, dry, concentrated algaecide formula that dispenses within hours to kill yellow and green algae. It protects against black, yellow and green algae outbreaks for up to six months and has 4x Stain Guard™ protection with 25% more stain inhibitors to protect pool surfaces.

FROG Clarifier 4Pro is the secret to leaving every pool on your route with crystal clear water. One pod restores clarity within hours. A monthly treatment keeps water clear and clients happy.

FROG Phosphate Remover 4Pro first removes phosphates quickly and easily to restore water clarity, then once-monthly treatments prevent phosphate buildup or clouding for up to 30 days.

The first FROG 4Pro pool pod to release in 2024, FROG Algae Blocker 4Pro, won the award for “Most Innovative Product for Service Professionals” at the 2024 International Pool Spa Patio Expo. Pool professionals recognized FROG 4Pro Drop ‘n Go Pod Protection for how easy it is to use, how much lighter it is to transport from job to job compared to heavy liquid chemicals, and its ability to solve common water care issues within hours and prevent future issues for up to six months. The dry, concentrated, pre-measured Drop ‘n Go pool pods stand out in a market of liquid algaecides and chemicals.
