FROG Leap Anti-Bac Mineral Pac™
Patented Mineral Pool Disinfectant
Operational Instructions

REPLACE EVERY 6 MONTHS OR AFTER ONE POOL SEASON, WHICHEVER IS SHORTER.

+FROG LEAP Mineral System consists of the FROG LEAP minerals silver chloride and carbonate used in conjunction with 0.5 ppm chlorine. The FROG LEAP Anti-Bac Mineral Pac must be used in conjunction with the FROG LEAP Torpedo Pac (EPA Reg. No.: 53735-2), an EPA registered chlorine pool product or a chlorine delivery device.
Swimming Pool Tips

1. Make sure the pool has adequate circulation. The pool water must completely circulate through the pump and filter at least 1 to 2 times per day. This usually requires 8 to 12 hours. Check with your dealer for the proper circulation time for your pool.

2. Before beginning with any pool care program, you must first balance your pool water. Take a water sample to your local pool professional who will test for the following important elements.

Water Balance Guidelines

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Range</th>

<td>150 – 400</td>
</tr>
<tr>
<td>Total Dissolved Solids</td>
<td>&lt;1500</td>
</tr>
<tr>
<td>Stabilizer</td>
<td>20 – 80 ppm</td>
</tr>
<tr>
<td>Free Chlorine</td>
<td>0.5 – 1.0 ppm</td>
</tr>
</tbody>
</table>

3. If your fill water is high in metals, use a sequestering agent or metal out at start-up only before using a FROG Leap Anti-Bac Mineral Pac. See your local dealer for details on using these products and always follow manufacturers’ directions carefully.

4. After your pool is up and running smoothly, continue to test your water for pH, total alkalinity and chlorine with FROG Brand Test Strips and maintain its balance by adding any necessary adjustment products (see your dealer for details).

5. Check the pool’s filter gauge often and periodically clean filter per the manufacturer’s directions. A dirty filter will slow the flow of water which could hamper proper circulation.

6. When chlorine reading is down to 1.0 ppm, which may take a few days, insert FROG Leap Torpedo Pac (see page 4 for directions).

7. If using standard chlorine shock do not add in or near the skimmer or into the FROG Leap Infuzer or POOL FROG Cycler as it could damage equipment, risk potential explosion or discolor your pool surface.

Start-up and Operation - FROG Leap Anti-Bac Mineral Pac now with 25% More Water Polishers for easier start up.

1. Add a stabilizer or conditioner to the pool at the beginning of the season if the stabilizer level is below 20 ppm. This will prevent chlorine burn off. Follow manufacturer’s directions carefully.

2. Install an FROG Leap Anti-Bac Mineral Pac into the FROG Leap Infuzer or POOL FROG Cycler (see page 3 for directions).

3. Shock the pool with FROG Leap Depth Charge to rid the water of contaminants (see page 4 for directions).

4. After your pool is up and running smoothly, continue to test your water for pH, total alkalinity and chlorine with FROG Brand Test Strips and maintain its balance by adding any necessary adjustment products (see your dealer for details).

5. For a 90 day algae protection guarantee, insert FROG Leap ALL-OUT into FROG Leap Anti-Bac Mineral Pac in FROG Leap Infuzer or POOL FROG Cycler (see page 4 for directions).

6. When chlorine reading is down to 1.0 ppm, which may take a few days, insert FROG Leap Torpedo Pac (see page 4 for directions).

7. SETTING CONTROL DIAL Set control dial by matching up the parameters of your pool on the charts below. THIS IS A STARTING POINT ONLY and may need to be adjusted to fit your individual pool needs. See #8 for directions.

* – Bypass Installation recommended.
NR – This pump size is not recommended for this size pool.
8. For the first week test the pool water daily for free chlorine with FROG Brand Test Strips to ensure correct dial setting. Continue to test weekly throughout the season.

After testing, adjust the dial up by 1/2 increment if the free chlorine reading has dropped below 0.5 ppm or down by 1/2 increment if the reading has risen above 1.0 ppm. Continue this process each day until the color on the test strip matches the ideal FROG range of 0.5 ppm to 1.0 ppm chlorine.

Remember to adjust dial by 1/2 increments only, in order to prevent over chlorination which may bleach pool surfaces.

9. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the shock treatment used.

Do not add shock in or near the skimmer or into the FROG Leap Infuzer or POOL FROG Cycler as it could damage equipment, risk potential explosion or discolor your pool surface.

If using another means of chlorine - Follow steps 1-5 on Start-up and Operation and then continue below.

6. Maintain setting of Maximum, Setting 5 or ON depending on the model. No adjustments needed.

7. Maintain a minimum chlorine reading of 0.5 ppm with a chlorine delivery device or hand feeding.

8. Shock pool every two weeks or as needed to maintain water quality. Follow label directions on the shock treatment used.

Do not add shock in or near the skimmer or into the FROG Leap Infuzer or POOL FROG Cycler as it could damage equipment, risk potential explosion or discolor your pool surface.

How To Replace the FROG Leap™ Components.

Replacing FROG Leap Anti-Bac Mineral Pac

1. Make sure you have the correct FROG Leap Anti-Bac Mineral Pac to fit your FROG Leap Infuzer or POOL FROG Cycler. Series 7800 for use in FROG Leap Infuzer Model 7800 and POOL FROG Cycler Models 4500, 5100, 5200, 6100, 6500.

THE FROG LEAP ANTI-BAC MINERAL PAC MUST BE REPLACED EVERY 6 MONTHS OR AFTER ONE POOL SEASON, WHICHEREVER IS SHORTER.

2. IMPORTANT: Remove and read the inserted information card.

CAUTION read carefully.
Use ONLY the factory recommended FROG Leap Anti-Bac Mineral Pac, FROG Leap ALL-OUT, FROG Leap Depth Charge, FROG Leap Reveille and FROG Leap Torpedo Pac. DO NOT USE bulk chemical tablets or any other pac in the cycler. Use of any other product could result in damage to pool equipment or surface, unsafe pool conditions, fire or explosion. Warranty will be VOID if the correct FROG Leap Anti-Bac Mineral Pac, FROG Leap ALL-OUT, FROG Leap Depth Charge, FROG Leap Reveille and FROG Leap Torpedo Pac are not used.

3. Turn off pump and turn dial to Pac Removal, Setting 0 or OFF depending on the model.

4. Open cap. If using FROG Leap Torpedo Pac stand back to avoid inhaling chlorine fumes.

Find slot on side of FROG Leap Anti-Bac Mineral Pac and line up with fin inside the FROG Leap Infuzer or POOL FROG Cycler. Lower FROG Leap Anti-Bac Mineral Pac until secure.

5. Mark your calendar for the six month replacement of the FROG Leap Anti-Bac Mineral Pac and approximate replacement times for the FROG Leap Torpedo Pac. Once wetted, the time-released mineral coating of this product is effective up to 6 consecutive months or one pool season whichever is shorter. After that time even if you hear the spent media inside it is no longer effective and must be replaced.
Replacing FROG Leap Depth Charge™, FROG Leap Reveille™ or FROG Leap Torpedo Pac™

FROG Leap Depth Charge is a one time start-up product used to rid the water of contaminants. FROG Leap Reveille - also used at start up, sets the chlorine residual to help find the proper dial setting for maintaining up to 50%* less chlorine while using the FROG Leap Torpedo Pacs (EPA Reg. No.: 53735-2). All three products sold separately.

1. **COLORED CAPS**
   - Replace cap by hand only.
   - DO NOT OVER TIGHTEN.

2. **TOWERS**
   - Turn pac over and shake slightly until ingredients fall into tower areas.

3. **TOWERS**
   - Line up the small leg of the pac with the small opening in the pac and the large leg with the large opening. Lower pac into FROG Leap Anti-Bac Mineral Pac until secure.

4. **TOWERS**
   - Replace cap by hand only.
   - DO NOT OVER TIGHTEN.

5. **TOWERS**
   - Run the pump and filter for each pac according to the directions on the product label. Remove from the FROG Leap Infuzer or POOL FROG Cycler when empty and discard or offer for recycling.

6. **TOWERS**
   - Lift FROG Leap ALL-OUT up and allow any water in the container to drain through the system before recycling or discarding in trash.
   - NOTE: If water shows more than a hint of blue inside FROG Leap Infuzer or POOL FROG Cycler, replace the cap, turn dial to Maximum, Setting 5 or ON and run the pump for one minute.
   - 6A. If pool size requires additional FROG Leap ALL-OUT, repeat steps 1-6.
   - 6B. When water is clear in FROG Leap Infuzer or POOL FROG Cycler proceed to install FROG leap Torpedo Pac.

The pacs are made of HDPE plastic. Non-refillable container. Do not reuse or refill this container. Offer for recycling if available. Rinse thoroughly before recycling or discarding in trash.

For an easy two-step pool closing program, use FROG Leap Depth Charge and FROG Leap ALL-OUT following the directions above.

*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.
